

CONTENTS

1 . A Study of New Ultrasonic Sensing Method Installed in Sensor Network (2 nd Report)	Mitsutaka HIKITA, Natsuki TOBITA	1
2 . FEM Analysis of the Deformation and Displacement of Balls and Metallic Bats during and after Batting Balls	Ryousuke OGATA, Takuya INOUE, Naoki NIWA, Mituo KOBAYASHI, Hisami OOISHI, Kunio KOKUBO	5
3 . Study on robot that can grow like humans – Verification of human size, weight, and walking simulation –	Keisuke SUZUKI, Hideaki TAKANOBU, Kenji SUZUKI, Hirofumi MIURA	9
4 . Space Securing in Minimally Invasive Surgery – Development of master system considering maneuverability –	Shingo IZUMI, Hideaki TAKANOBU, Kenji SUZUKI, Hirofumi MIURA, Masakatsu G. FUJIE, Hiroshi ISEKI	17
5 . Stability Analysis of Inverter for Renewable Power Source	Tooru MORII, Junichi ARAI	23
6 . A Study of Islanded Operation of Power System Consisting of Battery Energy Strage System and Distributed Generation	Tomoki NAGAHIRA, Junichi ARAI	29
7 . Study on Fault Current Limiter Application to Distribution Network	Yoshitaka SUZUKI, Junichi ARAI	35
8 . Attempt of the Bistable Switching with In-plane Electrode in the Bistable LC Cell Fabricated by the Oblique Irradiation Method of Polarized UV Light	Tatsunari KADO, Taiju TAKAHASHI	39
9 . Fundamental Characteristics of Vertical Alignment Bistable LCD with BTN Mode by Using $\Delta\epsilon < 0$ Nematic LC Material	Shinichi NAKAMURA, Taiju TAKAHASHI	45
10. Control of Pretilt Angle for the Nematic LC on the UV Curable LC Polymer Film as an LC Alignment Film	Yuki SANO, Taiju TAKAHASHI	51
11. Investigation of Bistable Display Cells for Applying to an Electric Paper with Electro-wetting (EW) Method by Using Nematic LC	Tatsuya SAITO, Taiju TAKAHASHI	55
12. Optimization of Chiral Pitch of LC Material for the Bistable Twisted Nematic LCD by Using N_n^* LC	Takashi TERASAWA, Taiju TAKAHASHI	59
13. Alignment Control of LC Director on the Inorganic Alignment Layer with the Anode Oxidation Treatment of Al Film	Shota OHKI, Taiju TAKAHASHI	63
14. Improvement of the Electrooptical Characteristics of Bistable LCD Using Ciral Nematic LC Material with Negative Dielectric Anisotropy	Ryou EBIHARA, Taiju TAKAHASHI	67
15. Control of the Pre-tilt Angle for Nematic LC Alignment by Using the Novel Time-multiplexed ESD method	Yukihiro KUDOH, Yuta UCHIDA, Taro NAKANO, Taiju TAKAHASHI	71
16. Fabrication of the Bistable Surface for Nematic LC with Two kinds of LC Alignment Materials by Using ESD Method	Taro NAKANO, Yukihiro KUDOH, Taiju TAKAHASHI	75
17. A simulation for Interface of Interlinked Homes Network	Naoki HAGIWARA, Yusaku FURUDATE, Juhro TAKASE	81
18. A simulation for User-Terminal of Interlinked Homes Network	Yusaku FURUDATE, HAGIWARA, Juhro TAKASE	89
19. Highly Accurate Detection of Moving Persons and Its Occlusion Robust Tracking	Ryota KURIHARA, Osamu NAKAMURA	97
20. Isolation of Facial Parts and Its Extraction	Takamasa ISHIDA, Teruaki HIRANO, Osamu NAKAMURA	105
21. A consideration concerning the position and the role of building in business contingency plan	Takuro YOSHIDA, Masahiro MURAKAMI, Masamitsu MIYAMURA, Tomohiro KUBO	113
22. The basic study on the Academic Activity Continuity Plan for Engineering University – The research on business of each part to the Earthquake disaster at the East Japan Great Earthquake. –	Tsubasa SAKURAI, Daisuke INAGAKI, Takuro YOSHIDA, Masahiro MURAKAMI, Masamitsu MIYAMURA, Tomohiro KUBO	119

CONTENTS

23. The basic study on the Academic Activity Continuity Plan for Engineering University
– Survey on priority for business after earthquake disaster. –
.....Daisuke INAGAKI, Tsubasa SAKURAI, Takuro YOSHIDA,
Masahiro MURAKAMI, Masamitsu MIYAMURA, Tomohiro KUBO.....127

24. An Application of Network Theory to Avoid Social Isolation in a Super-Aged Society
..... Hisao SHIIZUKA.....135

25. The Abstracts of the Theses for Doctorates Conferred in Our University
..... Minoru UCHIYAMA.....147
.....Hiroshi IMAYA.....151
